## Goff's Manual G1 Bug Screen Doors

10' x 8' hand crank door pictured with yellow mesh

The Goff's G1 Bug Screen door offers multiple manual activation methods including chain hoist, hand crank, and spring assist. These manual methods are easy to use and offer long term durability.

- **Every G1 door ships partially pre- assembled to ensure high quality standards and reduce install time.**
- **Provides a seal at the loading dock to keep bugs & pests out of your facility.**
- **Three manual activation methods below:**

### Chain Hoist

Reliable chain hoist operator requires no maintenance & features an integrated brake to stop the door at any point in the opening.

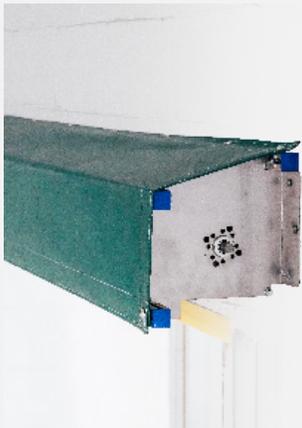

### Hand Crank with Drill Assist

Manual hand crank can be used to operate your door manually. Optional drill attachment available to operate door using a power drill.

### Spring System

Manual door system that utilizes a torsion spring to raise the door and side-guide pin that secures the door in the down position.

## G1 Plus Premium Header Box

Upgrade your G1 door with our G1 plus premium header box to:

- Maximize seal of door against wall
- Protect door roll from dust & debris
- Improved aesthetic of door

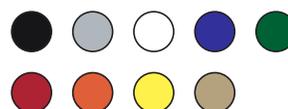

**Ask your sales rep today how a header cover can benefit you!**
