

LOW TO MEDIUM TRAFFIC

AVAILABLE UP TO 12' x 14'

Goff's Powered G1 Bug Screen Doors

Our Goff's G1 Bug Screen Door offers a powered activation method with two different speed options. With a fully-contained in-tube motor, the powered G1 Bug Screen is designed to put up with the harsh conditions of a loading dock, allowing fresh air in and keeping the bugs out, all at the flip of a switch.

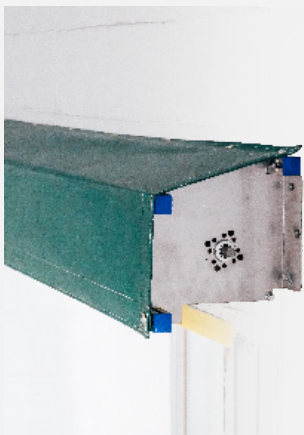

- **Every G1 door ships partially pre- assembled to ensure high quality standards and reduce install time.**
- **Available door speed of 12"/sec or 6"/sec .**
- **Provides a seal at the loading dock to keep bugs & pests out of your facility.**

Projection mounted 10' x 10' powered G1 door pictured with blue mesh.

Reflective Photo Eye safety sensors are available as an option for any powered door to stop the door from closing, maximizing safety.

Comes standard with a Toggle Switch, but has the option to be controlled with a remote, pull cord or NEMA1 controller.

Ability to operate your concealed in-tube motor at speeds of 6"/second or 12"/second depending on your speed preference.

G1 Plus Premium Header Box

Upgrade your G1 door with our G1 plus premium header box to:

- Maximize seal of door against wall
- Protect door roll from dust & debris
- Improved aesthetic of door

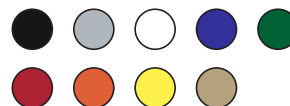

Ask your sales rep today how a header cover can benefit you!
