

Improving Productivity Through Flexible Space Separation.

Goff's

Goff's Roll-Up Curtain Walls

Open up your floor space with roll-up curtains.

For convenient & flexible separation in your facility.

Create a completely flexible floor plan.

Separating areas in your facility is often an overlooked opportunity to boost productivity & profitability for your business. Roll-Up Curtains provide the same great separation as our Original Curtain Walls, but are more concealed when not in use by allowing you to roll them up and out of the way. **Goff's Roll-Up Curtain Walls are designed to make space separation easy, while also allowing for an open floor plan with the push of a button.**

Convenient & flexible space separation.

Supported by our durable aluminum roll tube, our Roll-Up Curtain Wall system can be reliably concealed up and out of the way, allowing you to utilize open areas or segmented spaces with ease.

The ultimate modular space solution.

Combine our roll-up curtains with our Original Curtain Walls to create a multi-sided work area that allows for easy access into your space by simply activating your roll-up curtain.

Pick flexible curtain walls over permanent construction.

Constructing walls in a facility is expensive and time consuming, leaving you with a permanent structure that can't adapt to changing processes. Goff's Curtain Walls have been increasing efficiency of spaces for the last 30 years, allowing walls to move where current tasks need them.

Roll-Up Curtain Activation Methods:

Goff's Roll-Up Curtain Walls offer two different types of activation methods based on your frequency of use or facility activity.

- **For frequent space access or push button convenience,** choose our powered option. Available in 28"/sec or 18"/sec via in-tube motor concealed in the roll tube.
- **For non-powered areas or less frequent access,** choose our manual hand crank activation option, which can manually move the curtain to stay open at any height.

Pre-Assembled for your Convenience:

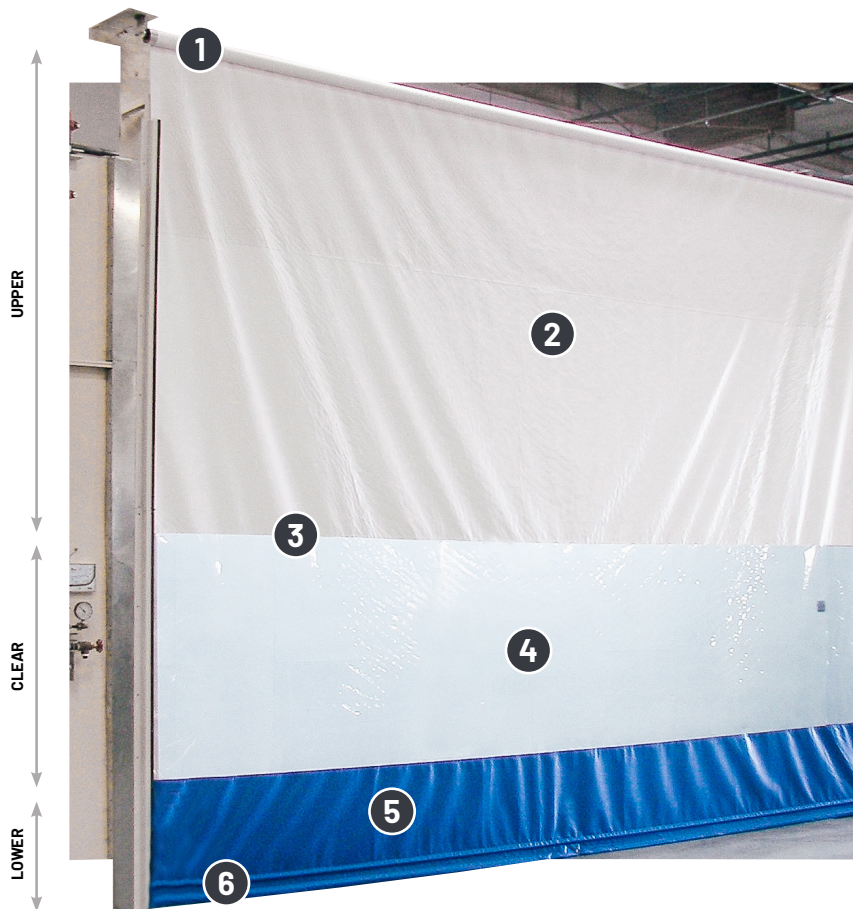

All Roll-Up Curtains ship pre-assembled to your facility to ensure the highest quality standards and to reduce install time. Simply mount your rolled-up assembly to the ceiling, apply power if applicable, and you're up and running!

What you need, where you need it.

Goff's Roll-Up Curtain Walls are manufactured in the USA. Our roll up curtain system can be made in various sizes for your needs, and come standard with these premium features:

- 1. Durable aluminum roll tube** for your curtain to be conveniently rolled up and out of the way on.
- 2. Upper curtain panel provides a barrier** between your spaces for the remainder of the height.
- 3. All seams are double lock stitched**, maximizing the durability of your Roll-Up Curtain Wall.
- 4. Clear window section maximizes lighting and visibility** for safety on both sides of the curtain.
- 5. Lower curtain panel provides a barrier** from window down to your floor to separate areas.
- 6. Chain weight and fiberglass pultrusion bar in lower pocket** keeps your curtain wall straight.
