

Bird Guard

KEEP BIRDS AWAY FROM YOUR LOADING DOCK

Add a mesh layer of protection to your loading dock to deter birds from landing and nesting in your loading dock shelter or within your awning structure. Keep these areas bird and contamination free.

Eliminate Bird Problems Near the Loading Dock

Goff's Bird Guard safely creates a physical barrier around the framing of your dock shelter, or within your awning structure, to prevent birds from entering and nesting in unwanted areas.

Avoid Contamination

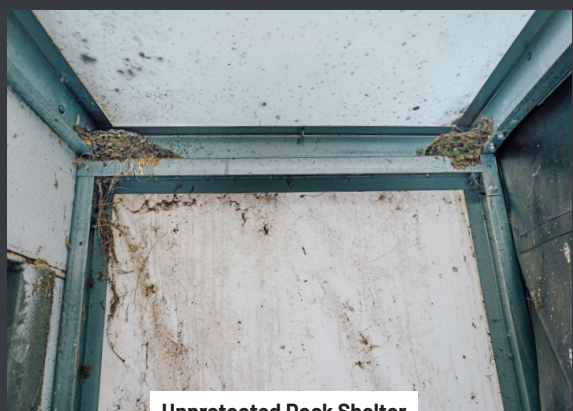

Landing and nesting birds create contaminated loading docks, which result in fines and plant shutdowns. Keep your dock clean with Bird Guard.

Easy to Install

We offer two different barrier designs that are quick & simple to install into your dock shelter for an instant bird and nest blocking solution.

Keep Your Dock Shelter Free of Contamination

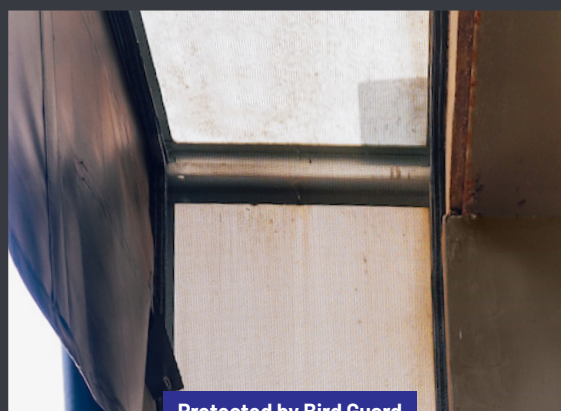

Unprotected Dock Shelter

On this dock shelter, where there is no Bird Guard installed, the birds made multiple nests in the corners of the framing and contaminated the entire perimeter of the shelter, ultimately resulting in us having to clean our entire dock.

Results after installing Bird Guard into our dock shelter.

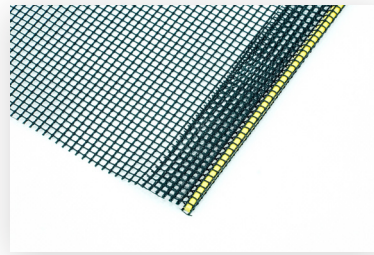

Protected by Bird Guard

On this dock shelter, where we installed a velcro Bird Guard, the framing is bird and contamination free. The barrier deters birds from entering and creating messy nests in the dock shelter that would have to be cleaned.

Two Installation Options:

- Reinforced kedered edge option for extra durability.
- An upgraded velcro option for a simple peel & stick method.
- Both designs continue along the full perimeter of the dock shelter and are compatible with any dock shelter.

Reinforced Edge

Our barriers come standard with reinforced, heat sealed keder for a durable barrier you can fasten to your dock shelter.

Upgraded Velcro Edge

Upgrade your barrier to include hook & loop velcro for a simple peel and stick installation method.

Built with Durable Mesh Material:

Bird Guard is made with an extruded mesh that is stable and durable for many industrial applications. This mesh is treated to resist against UV rays and mildew making it ideal for outdoor usage. It's lightweight design makes it easy to install into your dock shelter and will last for years to come.

FOR DOCK SHELTERS

FOR AWNINGS

Standard Sizes:

We ship all Bird Guards at a length of 35', allowing you to easily trim to your exact dock specifications for a perfect fit every time. Choose from our 4 width options of 24", 30", 36" or 68" to best fit your dock shelter or awning structure.
