

Goff's Side Seal Bug Door

The most economical screen solution for bug-free fresh air!

Side Seal Bug Doors are designed to easily slide open or closed at your facility openings, providing natural sunlight and airflow when closed.

Goff's Side Seal Bug Doors are the economical solution to promote fresh airflow while blocking bugs and pests at your facility openings.

Promote fresh airflow in your facility.

Goff's Side Seal Bug Door comes with a top valance and a floor sweep to form a tight seal against insects. The leading edge is stiffened with a fiberglass tube and pliable hem to assure a good seal to the jam.

Improve comfort & reduce energy costs.

Significantly reducing heat from the sun while allowing light in, doors provide a 65% shade factor, helping to keep your facility cooler longer. Improving ventilation increases productivity and comfort.

Mounting hardware is also available for increased flexibility & efficiency.

Goff's Manual Side Seal Bug Doors come delivered with pre-configured track to fit your dimensions & layout, with the ability to be reconfigured as needed, providing smooth, easy movement of all curtain systems for years to come.

- **Track & hardware is built with durable heavy-duty 16 gauge galvanized steel.**
- **Side Seals come standard with nylon rollers.**

Great for large openings:

Goff's Side Seal Bug Door provides a complete seal when fully closed, and compresses to a small bundle when retracted. When open, the included tie-back strap holds the curtain tightly bundled to provide maximum clearance in your doorway opening.

Wall Bracket:

Stainless steel wall bracket with key hole slot fastens door to jam to create a secure close and prevent blow out.

Center Cam Lock:

Extends a galvanized steel pin into the floor to prevent curtain from bowing with wind load.

18 oz Vinyl:

Valance panel constructed with 18 oz. solid vinyl. Solid vinyl is also an option for full curtain.

11 oz Mesh:

11x17 mesh polyester scrim provides small openings difficult for insects to penetrate.

Increase Efficiency At Your Loading Dock:

Do you have frequent traffic at your loading docks? Go the extra mile with a Goff's G1 Bug Door to conveniently open and close your dock door with the flip of a switch. Maintain shade factor while still allowing natural air flow to improve employee comfort. In colder months, you can easily swap out panels for solid vinyl to save on heating costs, while preventing your building contents from excessive wind entry.

Goff's delivers more than you expected.

With over 30 years of experience, the Goff's team is committed to delivering the most reliable and innovative solutions to improve efficiency in your facility.
