

Goff's Welding Blankets

Great solution to protect fragile or finished surfaces from welding & grinding sparks, metal debris, torch cutting, and more!

Instant Welding Protection

Protect yourself from welding and grinding sparks, molten and hot debris, torch cutting spatter and more with Goff's flexible and durable Weld Blanket.

Easy to Use, Clean, and Store

Constructed with a durable, tear resistant soft carbon fiber material, Goff's Weld Blankets will last! Just shake, blow or vacuum any metal particles out for a quick clean. Packaged in a reusable container for easy storage.

Refer to MSDS for Health & Safety Information.

Directions:

- Determine areas that need to be protected.
- Cover the desired areas with the drape. Be sure to cover in a manner in which sparks and debris cannot fall behind the drape.
- Keep creases and folds out of the product while in use; extended exposure to hot metals can damage the substrate although the material itself will not burn.
- When protecting horizontal surfaces, Goff's recommends using dual layers for best results.
- After use, remove the drape, lightly shake free any loose debris and store in the reusable container to keep it as clean as possible. Certain heavily accumulated dusts can become flammable when exposed to sparks or extreme heat.
- **DO NOT ALLOW DRAPE TO BE EXPOSED TO SOLVENTS**

Welding Blanket covering front of car.

Typical Physical Properties:

Test Method:

Welding Blanket Size	80" W x 72" H	Visual
Color	Black	Visual
Product Construction	Needled unsupported	Visual
Product Weight (oz/sq yd)	14-16	D461
Product Thickness (in)	.210-.290	D1777
Service Temperature	Short term resistance over 1800 degrees F	-
Flammability	Meets CA Fire Marshal Title 19 Section 1237 & NFPA 701	-
Flame, Smoke, & Toxicity	Meets ASTM E 162, E 662 & E 800	-
Base Material	100% Pre-Ox Pan	D276
Packaging	Packaged in reusable container.	Visual
